Duplicate Objects In A Repository

You can duplicate any existing objects within a repository.

Procedure

To duplicate objects:

1. In Design Center, open the **Repo Browser** and select the **Repo** and **Branch** for the repository you want to work in.
2. In the **Workspace** section, search for or navigate to the object you want to duplicate.
3. Click the context menu for the object and select **Duplicate**.

The object is duplicated and appears in the **Workspace** area, with `copy` appended to its unique name.
