

DIMENSION_UNIQUE_NAME

The unique name of the dimension to which this member belongs.

Syntax

```
Member_Expression.DIMENSION_UNIQUE_NAME
```

Input Parameters

N/A

Return Value

Returns the unique name of the dimension as a String.

Example

Sum the Distinct Customer Count Estimate `([Measures].[customercountestimate1])` of the current member's children.

```
SUM([DateCustom].[Retail445].currentMember.children, [Measures].[customercountestimate1])
```
