

Level

Syntax

```
Member_Expression.Level.Name
```

 **Note:** Currently, AtScale only supports the `.Name` property of the `.Level` property.

Input Parameters

Member_Expression

A valid Multidimensional Expression (MDX) that returns a member.

Return Value

Returns the member's Level's Name.

Example

If processing the [Product Categories] (All) level return 1, else return 0.

```
IIF([Product].[Product Categories].CurrentMember.Level.Name = "(All)", 1, 0)
```
