TRIM | LTRIM | RTRIM

The `TRIM` function removes both leading and trailing spaces from the specified string. `LTRIM` removes just leading spaces, and `RTRIM` removes just trailing spaces.

Syntax

`TRIM | LTRIM | RTRIM(string_expression)`

Return Value

Returns a string value without leading and/or trailing spaces.

Input Parameters

string_expression
    Required. A dimension attribute or expression that returns a string value.

Examples

`TRIM("  hello world ") returns "hello      world"`

`LTRIM(" hello world ") returns "hello world          "`

`RTRIM(" hello world ") returns "  hello      world"`
