

# Quarter

Returns an integer (1-4) representing the quarter of the year in which the specified date occurs. This function is equivalent to the expression `DatePart("q", Now())`.

## Syntax

```
Quarter(Date)
```

## Parameters

### Date

The date to return the quarter for.

## Example

The following expression returns the quarter in which 2005-10-05 occurred:

```
[DateCustom].[DateInt].[QuarterInt].&[ `Year("2005-10-05T12:30:10") ` ]&[ `Quarter("2005-10-05T12:30:10") ` ]
```
