

# QuarterStartDate

Given the input date, returns a date representing the first day of the Gregorian calendar quarter.

## Syntax

```
QuarterStartDate(Date)
```

## Parameters

### Date

The date to return the quarter start date for.

## Examples

The following expression returns the start date of the quarter in which 2007-05-12 occurred:

```
[DateCustom].[StandardMonth].[Quarter].&[QuarterStartDate("2007-05-12T12:30:10")]
```
