

# Upgrading AtScale

To upgrade AtScale, open a terminal window and run the following:

```
helm upgrade atscale oci://docker.io/atscaleinc/atscale --version <version_number> -f <override_file>
```

Where `<override_file>` is your values override file and `<version_number>` is the version of AtScale you want to upgrade to. For more information on the values override file, see [Installing AtScale](#).
