

DatesQTD

An alias for `DatesPeriodsToDate` with the `Level_Expression` argument dynamically set to the Quarter level of the `Member_Expression` argument's Time hierarchy.

For more information on `DatesPeriodsToDate`, see [DatesPeriodsToDate](#).

Syntax

```
DatesQTD(Member_Expression)
```

Input Parameters

Level_Expression

MDX reference to a Time-based Hierarchy Level.

Member_Expression

MDX reference to a member of a Time-based Level in the same hierarchy as `Level_Expression`. May be a static expression or a dynamic expression using `currentMember()`.
