

HIERARCHY_UNIQUE_NAME

The unique name of the hierarchy.

Syntax

```
Member_Expression.HIERARCHY_UNIQUE_NAME
```

Input Parameters

N/A

Return Value

The return value is the unique name of the hierarchy as a string.

Example

Define a calculated measure as follows. Selecting this measure will display `[DateCustom].[Retail445]` in the result set.

```
[DateCustom].[Retail445].currentMember.HIERARCHY_UNIQUE_NAME
```
