

# Siblings

Returns a naturally ordered set that contains the siblings of a specified member, including the member itself. For use with an aggregate function, i.e. `SUM( MemberExpression, Measure) .`

## Syntax

```
Member_Expression.Siblings
```

## Input Parameters

### Member\_Expression (Required)

A valid Multidimensional Expressions (MDX) expression that returns a member.

## Return Value

Returns a Set of Members

## Example

Compute the Product Category's fraction of sales relative to it's sibling categories.

```
[Measures].[Internet Sales Amount Local] / SUM([Product].[Product Categories].CurrentMember.Siblings, [Measures].[Internet Sales Amount Local])
```
