

TRIM | LTRIM | RTRIM

The `TRIM` function removes both leading and trailing spaces from the specified string. `LTRIM` removes just leading spaces, and `RTRIM` removes just trailing spaces.

Syntax

```
TRIM | LTRIM | RTRIM(string_expression)
```

Return Value

Returns a string value without leading and/or trailing spaces.

Input Parameters

`string_expression`

Required. A dimension attribute or expression that returns a string value.

Examples

```
TRIM(" hello world ") returns "hello world"
```

```
LTRIM(" hello world ") returns "hello world "
```

```
RTRIM(" hello world ") returns " hello world"
```
