

# Day

Returns an integer (1-31) representing the day of the month on which the specified date occurs.

## Syntax

```
Day(Date)
```

## Parameters

### Date

The date to return the day for.

## Example

The following example returns the day of the month on which 2007-07-05 occurred:

```
[DateCustom].[DateInt].[DayInt].&[Year("2007-07-05T12:30:10")]&[Month("2007-07-05T12:30:10")]&[Day("2007-07-05T12:30:10")]
```
