

Year

Given the input date, returns an integer (0-9999) representing the year.

Syntax

```
Year(Date)
```

Parameters

Date

The date to return the year for.

Example

The following example returns the year for 2005-10-08:

```
[DateCustom].[DateInt].[YearInt].&[ ` Year("2005-10-08T12:30:10") ` ]
```
