

Update Configuration Properties

Certain features and components of AtScale have additional configuration properties that you can update globally or override per organization. This includes deleting, and renaming your organization.

Procedure

- ▲ To update the configuration properties for a single organization, follow these steps:
 1. Click Settings.
 2. Click Organization under Organization Settings.
 3. Find the property you want to change under Configuration and click **Update** (for global level settings) or **Override** (for the single organization level setting, Port).
 4. Enter the new value and click **Update Property** or **Save** (for the Port Configuration).

- ▲ To update the configuration properties for all organizations at once, follow these steps:
 1. Click Settings.
 2. Click Configuration under Global Settings.
 3. Find the property you want to change and click **Update**.
 4. Enter the new value and click **Update** again.

- ▲ To Delete an Organization:
 1. Type in the name of your Organization exactly as it appears under Organization name (this input is case sensitive).
 2. Select "I understand the consequences, delete this organization."

What To Do Next

Click the AtScale icon at the top left of the page to return to the home screen.
