

Create An Organization

AtScale allows you to have multiple organizations. Each organization is managed independently of other organizations.

Before You Begin

You must be logged in as a super user to create an organization.

Note: As part of setting up a new organization, you enter a port number for the organization. Consult your system administrator about which port is available for use.

Procedure

To create an organization:

1. Select **Settings** from the main navigation, choose **Organizations** under the Global Settings section.
2. Click Create Organization.
3. Enter a Name for the organization. The name should not contain spaces or special characters.
4. Enter the port number for the organization.
5. Click **Create Organization**.
