

Engine Settings For Both System-Defined And User-Defined Aggregates

There settings that you can use to influence the behavior of the AtScale engine with regard to system-defined and user-defined aggregates. The settings apply to all of the aggregates that are in the organization for which an AtScale engine is registered.

For descriptions of the different types of aggregate, see [Types of Aggregate Tables in AtScale](#).

- ▲ [Settings for Enabling and Configuring Incremental Builds](#)
- ▲ [Settings for Enabling and Prioritizing Builds of Aggregate Instances](#)
- ▲ [Settings for Configuring Reattempts to Build Aggregate Instances](#)
- ▲ [Settings for Large Table Optimization](#)
- ▲ [Other Settings for Both System-Defined and User-Defined Aggregates](#)
