

# Using The Queries Tab

The Queries tab lets you view and filter queries.

Click the **Queries** tab to start working with queries.

A list of queries appears.

## About The Queries Pane

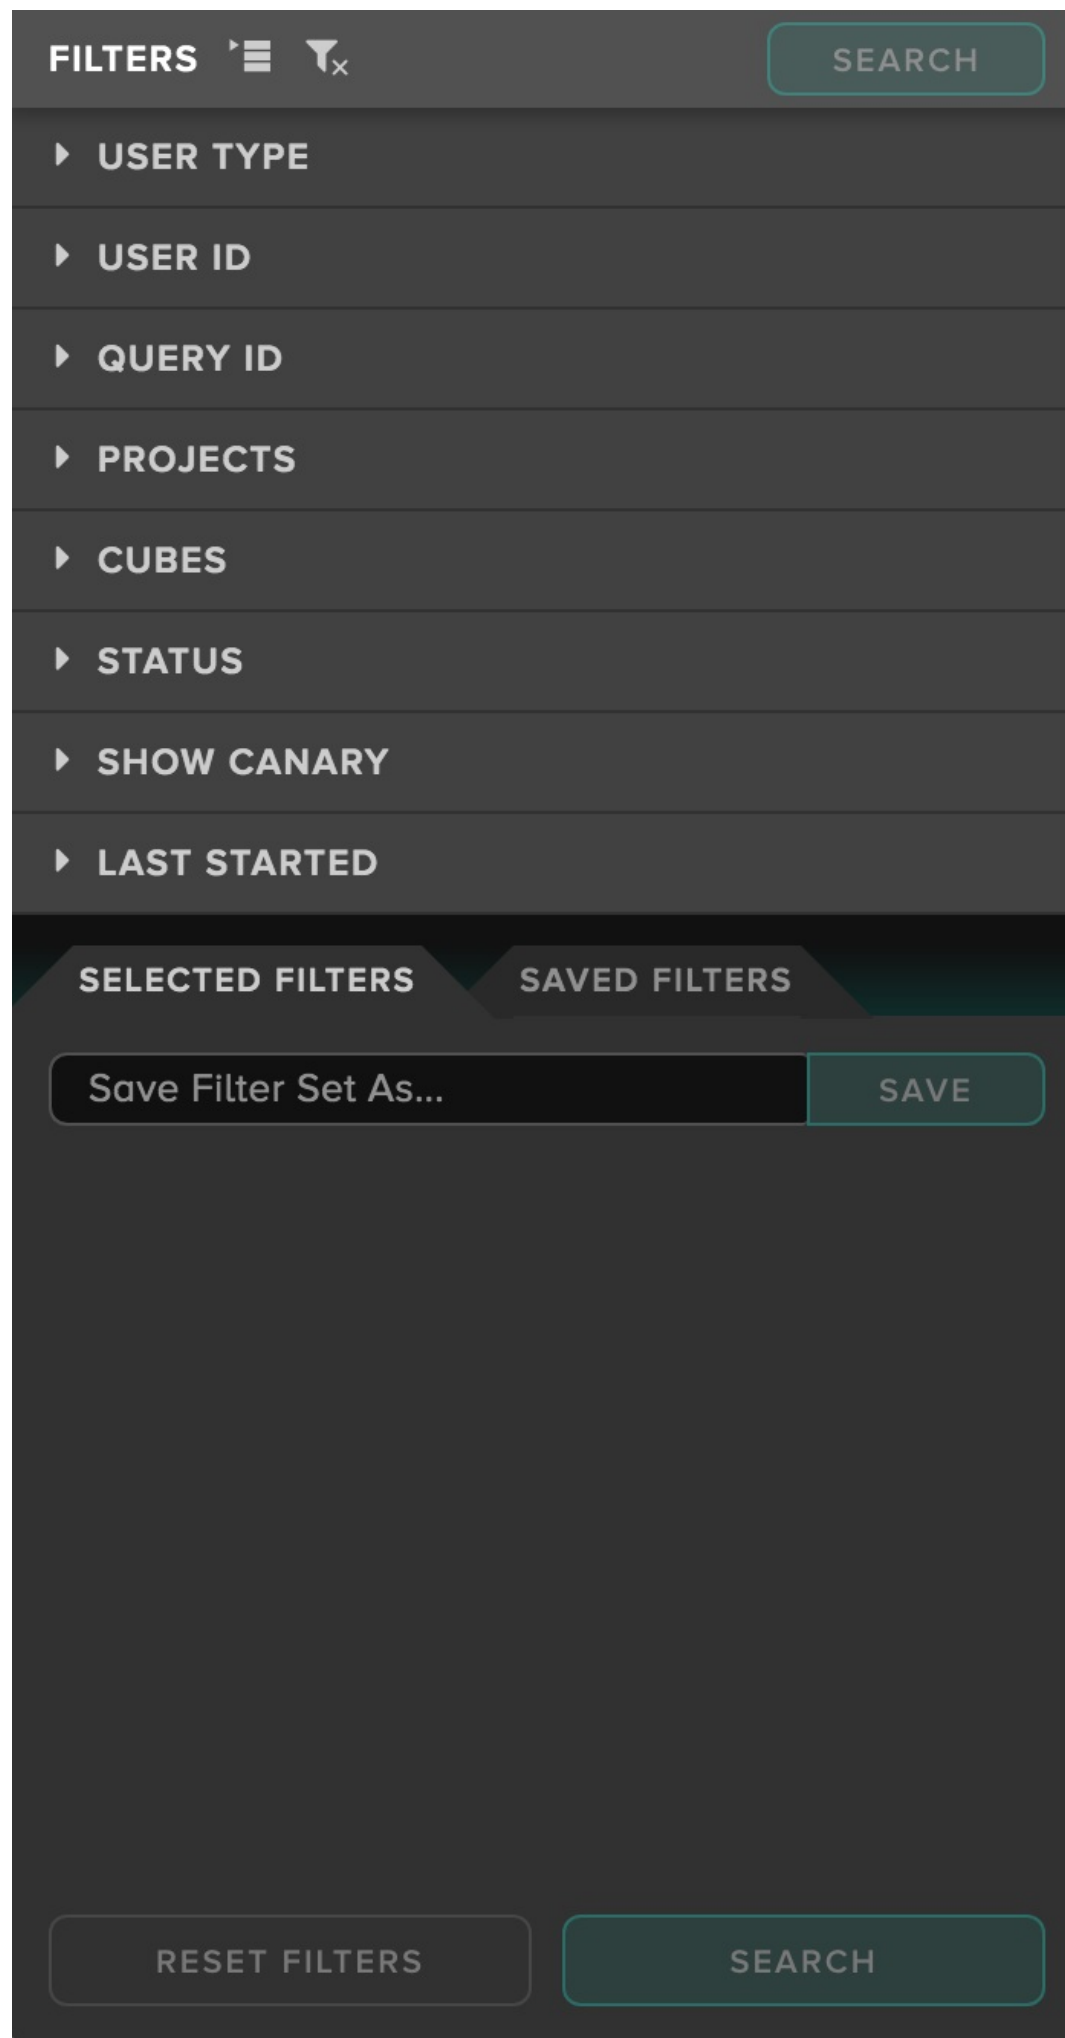

Use the View controls in the Queries pane to:

- ▶ View 20, 50, or 100 rows per page
- ▶ Sort the queries by ascending or descending **Start Time** by selecting **Start Time**.

You can also use the controls above and to the left of the list to refresh the view, or expand/collapse all rows. Pagination controls are above and to the right of the list.

## Filtering Queries

**Filters** are controlled from the left hand Filters pane.

You have many options for filtering queries, including:

- ▲ **User Type:** Select User or System administrated queries.
- ▲ **User ID** (for user queries): Search by excluding or including the User ID from filter results.
- ▲ **Query ID:** Enter the Query ID name
- ▲ **Projects:** Filter from the projects listed, or search your project to filter.
- ▲ **Cubes:** Filter from the cubes listed after selecting a project, or search your cube to filter.
- ▲ **Status:** Select the desired checkbox to filter by the following:

- ▶ Successful
  - ▶ Failed
  - ▶ Running
- 
- ▶ **Show Canary** (used to investigate user data access): Include canary queries in your search results.
  - ▶ **Last Started:**
    - ▶ Specify a time range using the calendar and time controls after expanding the Last Started filter.
    - ▶ Filter on the past n day(s), hour(s), or minute(s).
  - ▶ After inputting a value on any filter, the **Search** button becomes functional.

You can save filters for future use:

- ▶ At the bottom of the Filter pane, enter the filter name and click **Save Filter**. The saved filter is added to the list on the **Saved Filters** tab.
- ▶ Click the x opposite a filter to clear it.

Click **Reset Filters** to clear your filter selections.
