

# Working With Cubes

This section describes how to use the Design Center to model cubes and publish projects.

- ▲ [Creating Cubes](#) This section explains how to design, create, and manage cubes using AtScale Design Center.
- ▲ [Publishing Projects](#) This section explains how to publish an AtScale project so that its cubes are available to client connections and queries.

For details about how to do access the most common project, cube, and setting-related tasks, see [Common Navigation Tasks](#).
