

PostgreSQL: Customer-Managed UDAF Installation

Download The Binaries

Follow this [link](#) to download the `.tgz` file and `SHA512` hash.

PostgreSQL: Move And Extract The .Tgz

Once you download the HLL `.tgz` file it needs to be transferred to the PostgreSQL host. Extract the binary into a known location as the path will be required. This could be the PostgreSQL extension directory or other.

PostgreSQL: REGISTER THE HLL FUNCTIONS

1. Open the [SQL Script](#) with a text editor, and replace the location in the SQL to the HLL files.
2. Execute the edited SQL File.
