

Public Engine APIs

For more information about the Engine APIs check the main AtScale documentation:

- ▶ [Developing Applications that Use AtScale](#): how to configure webhooks, and how to monitor the AtScale service endpoints.
- ▶ [Managing AtScale > Managing Aggregates > Rebuilding Aggregates Using the REST API](#): how to use the `aggregate-batch` endpoint of the AtScale engine REST API to trigger an initial build (or rebuild) for all aggregates of a published cube.
