

# LEVEL\_UNIQUE\_NAME

The unique name of the level to which the member belongs.

## Syntax

```
Member_Expression.LEVEL_UNIQUE_NAME
```

## Input Parameters

## Return Value

Returns the unique name of the level as a String

## Example

Don't display sales amount at the `Order Reporting_Year` level, however display sales amount at all other levels.

```
IIF([Order Date Dimension].[Order Retail445].currentMember.LEVEL_UNIQUE_NAME = "[Order Date Dimension].[Order Retail445].[Order Reporting_Year]", NULL, [Measures].[salesamount1])
```
