

MonthStartDate

Returns a date representing the first day of the Gregorian calendar month in which the input date occurs.

Syntax

```
MonthStartDate(Date)
```

Parameters

Date

The date to return the month start date for.

Example

The following example returns the first day of the month in which 2005-08-15 occurred:

```
[DateCustom].[StandardMonth].[Month].&[ ` MonthStartDate("2005-08-15T12:30:10") ` ]
```
