

Delete An Organization

Deleting an organization deletes all objects created in that organization, such as users and groups, system roles, projects and cubes. This action cannot be undone.

Before You Begin

- ▶ You must be logged in as a super user to delete an organization.
- ▶ You must delete all existing Data Warehouse configurations present on your organization before deleting the organization.

Procedure

1. Select **Settings > Data Warehouses**
2. Select **Delete** adjacent to all Data Warehouses for the organization you plan to delete.
3. Select **Settings**, click **Organization**.
4. Go into the organization you want to delete.
5. Scroll to the bottom of the page to the **Delete Organization** section.
6. Type the organization name to confirm the organization you want to delete.
7. Click **I understand the consequences, delete this organization**.
